**LOT 44 - Kaysah Upholstered Power Recliner**

**Description**

The recliner surface selection texture is soft teddy fleece material, touch is very comfortable, soft touch coupled with a lovely appearance, lying on the recliner chair you feel as being wrapped in clouds of comfort; warmth is another highlight of its excellent, cold seasons lying in such a power recliner chair is no longer appropriate. Have annoying static electricity in the dry season? You can rest assured, that we chose the teddy fleece with special treatment, has a good anti-static, even in dry weather will not produce static electricity, the use of more safe and reliable.

**Features**

- The electric button is set on the right side of the recliner for adults without taking up space, the angle of the reclining living room chair can be adjusted as you like, so you can lie down as you like. Long press the first button to adjust the footrest and backrest counterclockwise after you sit down, when the footrest opens to 75°, the backrest starts to run until 150°, when you find the angle

suitable for you, you can release the button; when you want to get up after resting, please use the second button to let the footrest return to the upright state before getting up and leaving from the modern recliner chair.

- The unique structural design of this power recliner features a track recessed design that allows you to easily assemble it without additional tools. We have simplified the tedious installation steps so that even if you live alone, you can easily complete the assembly of this power recliner by following the steps in the instructions and videos. To ensure a foolproof installation, we recommend that you align the inserts when installing the two side armrests and backrest frames components and then insert them completely from the top to the bottom.
- A separated 2M power cord makes it more flexible and convenient. The length is moderate, which can meet the needs of indoor use, but does not look too long. The organizer bags on both sides of the armrest can conveniently store the power cord to avoid cable clutter. In addition, we recommend that you prepare a mobile power supply on your own to provide additional power security for the power sofa, even in the event of a power outage, you can connect the mobile power supply and the power recliner sofa to allow the chair to work normally. This way, you don't have to worry about power problems when you are enjoying your leisure time.
- A powerful motor core ensures that the electric recliner can run for a long time without lagging, but our standards for the motor are far more than that, the sound emitted when the motor is running is only equivalent to the volume of someone whispering next to your ear, to ensure that whether you are in the nap, or the office can be quiet and enjoy the comfort that reclining chairs for adults bring to you.
- This is not a simple baby chair, the effective area of the seat 21"X21" is enough for an adult's seating needs; strong support and stability ensure that it can easily carry the weight of up to 330LB; the recliner on both sides of the organizer pockets are easy for you to use to store your cell phone, iPad, eyeglasses, lipstick, magazines, power cords, etc.; classic and minimalist design can be perfectly adapted to a variety of home decorating style. The classic and simple appearance design can be perfectly adapted to various home decorating styles, plus a variety of practical functions to take your quality of life to a higher level.
